AMENDMENTS TO THE CLAIMS

This listing of claims replaces all prior versions, and listings, of claims in the application.

- 1.-4. (Canceled)
- (Currently Amended) A method for enhancing an immune response in a subject, comprising
- a) isolating a population of cells comprising one or more of a mature B cell and a B
 cell progenitor from the subject;

b) contacting the population of cells comprising one or more of a mature B cell and a B cell progenitor with a composition comprising (i) an IL-21 polypeptide comprising the amino acid sequence of SEQ ID NO: 1 or (ii) a variant of the amino acid sequence of SEQ ID NO: 1 except for I-5 amino acid substitutions, deletions, or additions, and wherein the variant retains the ability to bind to the IL-21 receptor and produce a physiological effect produced by binding of the IL-21 polypeptide comprising the amino acid sequence of SEQ ID NO: 1 to the IL-21 receptor,

wherein the population of cells optionally is contacted with at least one composition composing an antigen, and wherein the composition induces differentiation of at least one of the mature B cell and the B cell progenitor into one or more of a memory B cell and a plasma cell:

- c) isolating or purifying one or more of the memory B cell and the plasma cell; and
- d) introducing at least one of the memory B cell and the plasma cell into the subject, thereby enhancing the immune response.
 - 6. (Canceled)
 - (Canceled)

 (Previously Presented) The method of claim 5, wherein the subject is a human subject.

(Canceled)

- (Previously Presented) The method of claim 5, wherein the population of cells is contacted with at least one composition comprising an antigen.
- (Original) The method of claim 10, wherein the antigen comprises a viral antigen. a bacterial antigen, or an antigen from a parasite.
- 12. (Previously Presented) The method of claim 5, wherein the B cell progenitor is an immature B cell

13.-17. (Canceled)

- (Currently Amended) A method for treating a subject with a condition comprising a specific deficiency of at least one of memory B cells and plasma cells, comprising
- a) isolating a population of cells comprising one or more of a mature B cell and a B cell progenitor from the subject;
- b) contacting the population of cells comprising at least one of a mature B cell and a B cell progenitor ex vivo with a composition comprising (i) an IL-21 polypeptide comprising the amino acid sequence of SEQ ID NO: 1 or (ii) a variant of the amino acid SEQ ID NO: 1 to very the variant comprises the amino acid sequence of SEQ ID NO: 1 except for 1-5 amino acid substitutions, deletions, or additions, and wherein the variant retains the ability to bind to the IL-21 receptor and produce a physiological effect produced by binding of the IL-21 polypeptide to the IL-21 receptor,

wherein the population of cells optionally is contacted with at least one composition composition an antigen, and wherein the composition induces differentiation of at least one B cell into one or more of a memory B cell and a plasma cell;

c) isolating the memory B cell, the plasma cell, or both; and

- d) introducing at least one of the memory B cell and the plasma cell into the subject.
- (Canceled)
- (Previously Presented) The method of claim 18, wherein the subject is a human subject.
 - 21.-31. (Canceled)
- (Previously Presented) The method of claim 5, wherein the composition comprises (i) the IL-21 polypeptide comprising the amino acid sequence of SEQ ID NO: 1.
- (Previously Presented) The method of claim 18, wherein the composition comprises (i) the IL-21 polypeptide comprising the amino acid sequence of SEQ ID NO: 1.
- (Previously Presented) The method of claim 5, wherein the composition comprises (ii) the variant of the amino acid sequence of SEQ ID NO: 1, wherein 1-5 amino acids of SEO ID NO: 1 have been substituted, deleted, or added.
- (Previously Presented) The method of claim 18, wherein the composition comprises (ii) the variant of the amino acid sequence of SEQ ID NO: 1, wherein 1-5 amino acids of SEQ ID NO: 1 have been substituted, deleted, or added.
